

REHD GARCIA COLIPANO

rgcolipano@gmail.com | Alberta, Canada

PROFESSIONAL SUMMARY

Detail-oriented **Configuration Analyst** with nearly 5 years of experience building, deploying, and maintaining digital insurance products within enterprise platforms. Proven track record in full-lifecycle portal development, front-end customization (JavaScript, HTML, CSS), API integration, and Microsoft SQL reporting. Adaptable technical problem solver skilled in Agile workflows, Git version control, and collaborating cross-functionally to streamline insurance product delivery.

TECHNICAL SKILLS

Core Technologies:	JavaScript, HTML5, CSS3, REST APIs / Web Services, Git / GitHub
Database & Reporting:	Microsoft SQL (T-SQL), Data Extraction, Financial & Business Reporting (GWP)
Platforms & Tools:	Enterprise Digital Insurance Platforms, Jira (Agile/Scrum), Version Control Workflows
Prior Exposure:	PHP, Laravel, WordPress, ASP.Net, DB2, Oracle, Cisco Network Security, React, SASS

WORK EXPERIENCE

Configuration Analyst Forward Insurance Managers Ltd.	November 2021 – Present
• Portal Development & Launch: Key technical contributor on the core launch team that designed, built, and deployed the company’s digital insurance portal from the ground up across configuration, testing, and release phases. • Digital Product Configuration: Configure, build, and maintain digital insurance products on an enterprise platform using JavaScript, HTML5, and CSS3. • API Integration: Configure and implement third-party APIs (such as geocoding/location intelligence) to pinpoint risk locations and automate underwriting logic. • Data Analysis & Reporting: Write custom queries in Microsoft SQL to extract key datasets and build financial and operational reports, including Gross Written Premiums (GWP). • Version Control & Agile Workflow: Manage repository version control, code updates, and releases using GitHub, while tracking daily tasks and deliverables in Jira within Agile workflows.	

PROJECTS & TECHNICAL EXPERIENCE

WordPress Developer Robert Stirbu Photography (Capstone Project)	Jan 2021 – Apr 2021
• Built a full e-commerce web platform leveraging HTML5, CSS3, JavaScript, and WooCommerce.	
Software Developer Intern Mundomo.com Inc.	Jun 2017 – Jul 2017
• Developed structured, testable PHP code using Laravel under MVC architecture and CRUD patterns.
